

RONAN R. SIBUNGA

Frontend Developer

SUMMARY

Results-driven Frontend Developer with 7+ years of experience building scalable and high-performance web and mobile applications using React, Next.js, and React Native.

Strong understanding of React hydration and rendering behavior, with hands-on experience analyzing Chrome DevTools Performance profiles to identify bottlenecks. Knowledgeable in Core Web Vitals (LCP, CLS, INP) and their impact on user experience, with the ability to diagnose and optimize performance issues. Familiar with querying and analyzing application performance data using New Relic.

Skilled in translating Figma designs into pixel-perfect, responsive interfaces, with a focus on clean code, scalability, and seamless user experience.

EXPERIENCE

Ascension / Collabera Team

Frontend Developer (Sub-Lead)

August 2024 – February 2025

Project: Cebu Pacific Air Desktop and Mobile App

- Developed and optimized cross-platform UI components using React Native (Expo)
- Ensured high performance and responsiveness across devices
- Collaborated with designers and backend engineers to improve UX/UI
- Implemented scalable and accessible frontend architecture
- Integrated and managed REST APIs
- Analyzed application performance using Chrome DevTools Performance tab and Lighthouse to identify rendering bottlenecks affecting Core Web Vitals (LCP, CLS, INP)
- Investigated React hydration and rendering issues, reducing unnecessary re-renders and improving time-to-interactive
- Utilized New Relic to monitor frontend performance and assist in diagnosing production-level issues

Viral Picks | Pasig City

Frontend Developer (React Native)

February 2024 – August 2024

- Built interactive and visually engaging mobile UI for iOS and Android
- Integrated GraphQL APIs for efficient data fetching and state management
- Conducted code reviews and optimized application performance

Veritas Pay | Pasig City

Frontend Developer (ReactJS / NextJS / React Native)

February 2023 – February 2024

- Developed and maintained a high-performance eCommerce web application
- Improved UX through responsive design and state management with Redux
- Enhanced SEO and loading performance using Next.js SSR
- Optimized React hydration to improve initial load performance and prevent server-client UI mismatches

Freelancing (Side Projects)

Frontend Developer (ReactJS / NextJS / JavaScript)

February 2020 – January 2022

- Designed and developed custom web applications with focus on UX and responsiveness
- Built reusable components and scalable frontend structures
- Maintained and improved existing frontend codebases

SKILLS

Performance Monitoring & Analysis:

React Hydration, Rendering Optimization, Chrome DevTools Performance Profiling, Core Web Vitals (LCP, CLS, INP), Lighthouse, New Relic

Frontend Technologies:

ReactJS, Next.js, React Native, JavaScript, TypeScript, HTML5, CSS3

State Management:

Redux, MobX, Jotai

UI/UX & Design:

Figma, Tailwind CSS, Material UI, Styled Components

Testing & Tools:

Jest, React Testing Library, Git, Jira, Azure DevOps

Performance Optimization & SEO:

SSR, Lazy Loading, React Hooks

API Integration:

REST APIs, GraphQL

CI/CD & DevOps:

Azure DevOps Pipelines (familiarity)

EDUCATION

Bachelor of Science in Computer Science

St. Dominic Savio School – 2013
